### **REASONS FOR ALLOWANCE**

1. Claims 12-15 are allowed.
2. Claims 1-11 and 16-20 are cancelled upon BPAI decision as Examiner Affirmed dated 01/23/2008.

3. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a tips calculator comprising: a base member, at least one display screen having a main display area and a share display area, a plurality of grouping of buttons including: a first grouping of buttons with numbers from 0 to 9 and at least mathematical function buttons of a decimal point, addition, subtraction, multiplication, division, and sum total, on, off, and clear buttons, whereby the first grouping of buttons is used to at least enter a bill amount; a second grouping of buttons including buttons designating tip amounts as percentages of the bill amount in one percent increments and in a range from 10 percent to at least 25 percent, a total amount button, whereby buttons designating a choice of tip amount as a percentage with display on the main display area and total amount button is used to obtain a total amount; and a third grouping of buttons include buttons designating numbers of members in a group as whole sequential numbers from 2 up to at least 12 and furthermore the third grouping of the buttons additionally includes a share button for a display in the share display area of the individual share during performance of

consecutive calculations on the tips calculator; and means for performing the functions of designated buttons and means for displaying as seen in independent claim 12.

The closest found prior arts are Boston et al. (U.S. 6,076,079) as the primary reference, Terriss et al. (U.S. 5,964,823) as the first secondary reference, and Ilium Software (“Tipster<sup>TM</sup>”) as the second secondary reference. Boston et al. disclose a basis tip calculator, but fail to disclose a share display area; partially a first group of buttons including at least mathematical function buttons of a decimal point, addition, subtraction, multiplication, division, and sum total; partially a second grouping of buttons including buttons designating tip amounts as percentages of the bill amount in one percent increments and in a range from 10 percent to at least 25 percent and a total amount button; and a third grouping of buttons include buttons designating numbers of members in a group as whole sequential numbers from 2 up to at least 12 and furthermore the third grouping of the buttons additionally includes a share button for a display in the share display area of the individual share during performance of consecutive calculations on the tips calculator. Terriss et al. disclose a commercial calculator with partially a first group of buttons including at least mathematical function buttons of a decimal point, addition, subtraction, multiplication, division, and sum total, but fail to disclose other features of the claimed invention. Ilium Software discloses a third grouping of buttons include buttons designating numbers of members in a group as whole sequential numbers from 2 up to at least 12 and furthermore the third grouping of the buttons additionally includes a share button for a display in the share display area of the individual share during performance of consecutive calculations on the tips calculator, but fails to disclose other

features of the claimed invention. With these lacking features in the primary reference, it is unobvious and unmotivated to a person having ordinary skill in the art at the time the invention is made to combine all three references with reasonable motivation to make an unique tips calculator as cited in the claimed invention above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
